ANALYTIC SUBJECT INDEX

Activated processes (see *Escape from potential well*) **149A** (1988) 296
Addendum
– — to Physica A 147 (1988) 601, Theoretical description of the methyl group relaxation in liquids - Blicharska **149A** (1988) 648

Bhatnagar–Gross–Krook model (see *Hilbert expansion*) **149A** (1988) 551
Boltzmann entropy (see *Maxwell molecules*) **149A** (1988) 638
Boltzmann equations (see *Plasma–charged particle interaction*) **149A** (1988) 313
Boltzmann equation, non-linear
– Evaluation of the entropy for Maxwell molecules - Zanette and Garibotti **149A** (1988) 638
Bridge function (see *Inhomogeneous fluid*) **149A** (1988) 215
Brownian motion (see *Colloidal suspensions, charged*) **149A** (1988) 123
Brownian motion (see *First passage time*) **149A** (1988) 395
Brownian motion (see *Oscillators, nonlinear*) **149A** (1988) 182
Burnett transport equations
– On the derivation of the Burnett hydrodynamic equations from the Hilbert expansion - Garzó **149A** (1988) 551

Classical particle, bound
– Kinetic equation for a classical test-particle model in the weak-coupling approximation - Tzanakis and Grecos **149A** (1988) 232
Collective properties (see *Raman scattering*) **149A** (1988) 283
Colloidal suspensions, charged
– Time-dependent self-diffusion in model suspensions of highly charged Brownian particles - Nägele et al. **149A** (1988) 123
Composite particles, non-relativistic
– A generalized Fock–Tani representation of non-relativistic systems containing composite particles - Gilbert **149A** (1988) 323
Correlation functions (see *Defect systems*) **149A** (1988) 561
Correlation functions (see *Inhomogeneous fluid*) **149A** (1988) 215
Critical properties (see *Mixed-spin model, d-dimensional*) **149A** (1988) 606
Cyclotron resonance (see *Damping expansion method*) **149A** (1988) 472

Damping expansion method
– Expansion formulae for time-correlation functions and transport coefficients. With an application to cyclotron resonance - Shibata and Ezaki **149A** (1988) 472
Defect systems
– Stochastic geometry of— - Holz and Vigren **149A** (1988) 561
Density of a liquid (see *Oscillating-cup viscometer*) **149A** (1988) 107
Dielectric ellipsoidal bodies (see *Electro-dilatometric effect*) **149A** (1988) 206
Discrete phase spaces
– An extended Weyl–Wigner transformation for special finite spaces - Galetti and De Toledo Piza **149A** (1988) 267

Double-well potential, symmetric
– Quantum dissipation: dynamics of a particle in a symmetric double well in the presence of non-ohmic friction - Aslangul et al. **149A** (1988) 535

Electric field transport, high
– A theory of high electric field transport - Hu and O'Connell **149A** (1988) 1
Electro-dilatometric effect
– Note on the— - Brevik and Høye **149A** (1988) 206
Entropy balance (see *Oscillations, sustained*) **149A** (1988) 182
Erratum
– — to Physica A 141 (1987) 81, On the consistent description of quantum relaxation processes: The harmonic oscillator - Eckhardt **149A** (1988) 369
– — to Physica A 141 (1987) 556, The continuous distribution function of the effective fields of the Ising spin glass of the $\pm J$ model - Katsura **149A** (1988) 371
– — to Physica A 126 (1984) 384, *PVT* properties of sulfur-hexafluoride in the gas–liquid critical region - Biswas et al. **149A** (1988) 649
Escape from potential well
– Thermally activated escape from a Lennard-Jones potential well - Larson and Lightfoot **149A** (1988) 296

First passage time
– —statistics for some stochastic processes with superimposed shot noise - Masoliver and Weiss **149A** (1988) 395
Fluctuating medium (see *Light scattering, stationary*) **149A** (1988) 507
Fock–Tani representation, generalized
– A generalized Fock–Tani representation of non-relativistic systems containing composite particles - Gilbert **149A** (1988) 323
Fokker–Planck dynamics (see *Self-diffusion, time-dependent*) **149A** (1988) 123
Fokker–Planck equation (see *Escape from potential well*) **149A** (1988) 296
Fourier convolution theorem
– An extension of the—in terms of Poisson brackets - Akama **149A** (1988) 631
Fractional exponentials (see *Relaxation in complex systems*) **149A** (1988) 358
Free energy (see *n-vector model*) **149A** (1988) 341

Gaussian process (see *Light scattering, stationary*) **149A** (1988) 507
Gaussian stochastic process
– From two-state jump to—es - Maruyama and Shibata **149A** (1988) 447
Ground-state entropy (see *Ising models, one-dimensional*) **149A** (1988) 432

Hamiltonian structures
– Lattice equations, hierarchies and—. II. KP-type of hierarchies on 2D lattices - Wiersma and Capel **149A** (1988) 49
Hamiltonian structures (see *Kadomtsev–Petviashvili equation*) **149A** (1988) 75
Hierarchies (see *Kadomtsev–Petviashvili equation*) **149A** (1988) 49
Hierarchies (see *Kadomtsev–Petviashvili equation*) **149A** (1988) 75
Hilbert expansion
– On the derivation of the Burnett hydrodynamic equations from the— - Garzó **149A** (1988) 551
Hydrodynamic flows
– The behaviour of the entropy during transitions far from thermodynamic equilibrium. II.— - Engel-Herbert and Ebeling **149A** (1988) 195
Hypercubic lattice (see *Spin-glass phase*) **149A** (1988) 164

Inhomogeneous fluid
– On the properties of the bridge function in simple fluids - Weyland **149A** (1988) 215
Inhomogeneous phenomena (see *Fourier convolution theorem*) **149A** (1988) 631
Input–output relation (see *Fourier convolution theorem*) **149A** (1988) 631
Integrable nonlinear systems (see *Kadomtsev–Petviashvili equation*) **149A** (1988) 49
Integrable nonlinear systems (see *Kadomtsev–Petviashvili equation*) **149A** (1988) 75
Ising models, one-dimensional
– The ground state and its entropy for a class of one-dimensional classical lattice systems - Nachtergaele and Slegers **149A** (1988) 432

Kadomtsev–Petviashvili equation
– Lattice equations, hierarchies and Hamiltonian structures. II. KP-type of hierarchies on 2D lattices - Wiersma and Capel **149A** (1988) 49
– Lattice equations, hierarchies and Hamiltonian structures. III. The 2D Toda and KP hierarchies - Wiersma and Capel **149A** (1988) 75
Kinetic equation (see *Classical particle, bound*) **149A** (1988) 232
Kramers theory (see *Escape from potential well*) **149A** (1988) 296

Laminar–turbulent transition (see *Transitions far from equilibrium*) **149A** (1988) 195
Langevin equation, generalized (see *Electric field transport, high*) **149A** (1988) 1
Laser field, intense (see *Raman scattering*) **149A** (1988) 283
Lattice equations (see *Kadomtsev–Petviashvili equation*) **149A** (1988) 49
Lattice equations (see *Kadomtsev–Petviashvili equation*) **149A** (1988) 75
Lenard–Belascu equations (see *Plasma–charged particle interaction*) **149A** (1988) 313
Lennard–Jones potential well (see *Escape from potential well*) **149A** (1988) 296
Light scattering, stationary
– Theory of stationary light scattering in a fluctuating medium - Maruyama and Shibata **149A** (1988) 507
Linear response laws (see *Defect systems*) **149A** (1988) 561

Markovian kinetic equations
– On—: Zubarev's nonequilibrium statistical operator approach - Łuczka **149A** (1988) 245
Master equation description (see *Relaxation in complex systems*) **149A** (1988) 358
Maxwell molecules
– Evaluation of the entropy for— - Zanette and Garibotti **149A** (1988) 638
Mean-field renormalization group (see *Mixed-spin model, d-dimensional*) **149A** (1988) 606
Mean-field theory (see *Wetting transition*) **149A** (1988) 622
Migdal–Kadanoff approximation (see *Spin-glass phase*) **149A** (1988) 164
Mixed-spin model, d-dimensional
– Renormalization group treatment of the mixed-spin system in *d*-dimensional lattices - Verona de Resende et al. **149A** (1988) 606
Mobility matrix
– —for arbitrary spherical particles in solution - Jones and Schmitz **149A** (1988) 373
Mode–mode coupling theory (see *Self-diffusion, time-dependent*) **149A** (1988) 123

n-vector model
– The spherical model as the limiting—in a random field - Theumann and Fontanari **149A** (1988) 341
Nonequilibrium molecular dynamics (see *Two-dimensional soft disc liquid*) **149A** (1988) 406
Nonstationary phenomena (see *Fourier convolution theorem*) **149A** (1988) 631

Ohmic function, non- (see *Quantum dissipation*) **149A** (1988) 535

Oscillating-cup viscometer
– On the theory of—s - Nieuwoudt et al. **149A** (1988) 107
Oscillating-disk viscometer (see *Oscillating-cup viscometer*) **149A** (1988) 107
Oscillations, sustained
– The behaviour of the entropy during transitions far from thermodynamic equilibrium. I. Sustained oscillations - Engel-Herbert and Ebeling **149A** (1988) 182
Oscillators, nonlinear
– The behaviour of the entropy during transitions far from thermodynamic equilibrium. I. Sustained oscillations - Engel-Herbert and Ebeling **149A** (1988) 182

Partial cumulant expansion method (see *Light scattering, stationary*) **149A** (1988) 507
Partial cumulant expansion method (see *Stochastic processes*) **149A** (1988) 447
Pasma oscillations
– Plasmon dispersion in dense, partially ionized plasmas - Barrat and Hansen **149A** (1988) 613
Plasma–charged particle interaction
– Energy loss of charged particles moving in a plasma - Kraeft and Strege **149A** (1988) 313
Plasmon dispersion
– —in dense, partially ionized plasmas - Barrat and Hansen **149A** (1988) 613

Quantum dissipation
– —: dynamics of a particle in a symmetric double well in the presence of non-ohmic friction - Aslangul et al. **149A** (1988) 535
Quasi-wetting
– —on a sphere - Hołyst and Poniewierski **149A** (1988) 622

Raman scattering
– Collective resonance—of an intense laser field with phase and amplitude fluctuations - Shumovsky et al. **149A** (1988) 283
Random fields (see *Spherical model*) **149A** (1988) 341
Relaxation in complex systems
– Comparison of some master equation descriptions of— - Rajagopal et al. **149A** (1988) 358
Resonance (see *Raman scattering*) **149A** (1988) 283

Self-diffusion, time-dependent
– Time-dependent self-diffusion in model suspensions of highly charged Brownian particles - Nägele et al. **149A** (1988) 123
Shear induced anisotropy
– —in two-dimensional liquids - Hanley et al. **149A** (1988) 406
Shot noise, superimposed (see *Stochastic processes*) **149A** (1988) 395
Single particle properties (see *Plasma–charged particle interaction*) **149A** (1988) 313
Smoluchowski equation (see *Self-diffusion, time-dependent*) **149A** (1988) 123
Spherical model
– The—as the limiting *n*-vector model in a random field - Theumann and Fontanari **149A** (1988) 341
Spherical particles in solution
– Mobility matrix for arbitrary— - Jones and Schmitz **149A** (1988) 373
Spin-glass phase
– Spin-glass in low dimensions and the Migdal–Kadanoff approximation - Curado and Meunier **149A** (1988) 164
Spin relaxation
– —in terms of thermo field dynamics - Tominaga et al. **149A** (1988) 26

– —of defect systems - Holz and Vigren **149A** (1988) 561
Stochastic processes
– First passage time statistics for some—with superimposed shot noise - Masoliver and Weiss **149A** (1988) 395
– From two-state jump to Gaussian— - Maruyama and Shibata **149A** (1988) 447
Stopping power (see *Plasma–charged particle interaction*) **149A** (1988) 313
Structure factor (see *Two-dimensional soft disc liquid*) **149A** (1988) 406
Sullivan model (see *Wetting transition*) **149A** (1988) 622

Thermal reservoir (see *Classical particle, bound*) **149A** (1988) 232
Thermo field dynamics
– Spin relaxation in terms of— - Tominaga et al. **149A** (1988) 26
Time-correlation functions (see *Damping expansion method*) **149A** (1988) 472
Toda equation, two-dimensional
– Lattice equations, hierarchies and Hamiltonian structures. III. The 2D Toda and KP hierarchies - Wiersma and Capel **149A** (1988) 75
Transitions far from equilibrium
– The behaviour of the entropy during transitions far from thermodynamic equilibrium. I. Sustained oscillations - Engel-Herbert and Ebeling **149A** (1988) 182
– The behaviour of the entropy during transitions far from thermodynamic equilibrium. II. Hydrodynamic flows - Engel-Herbert and Ebeling **149A** (1988) 195
Transport coefficients (see *Damping expansion method*) **149A** (1988) 472
Transport coefficients (see *Hilbert expansion*) **149A** (1988) 551
Transport of many electrons (see *Electric field transport, high*) **149A** (1988) 1
Two-dimensional soft disc liquid
– Shear induced anisotropy in two-dimensional liquids - Hanley et al. **149A** (1988) 406
Two-fermion system (see *Composite particles, non-relativistic*) **149A** (1988) 323
Two-state jump process
– From two-state jump to Gaussian stochastic processes - Maruyama and Shibata **149A** (1988) 447
Two-state jump process (see *Light scattering, stationary*) **149A** (1988) 507

Velocity fluctuations (see *Electric field transport, high*) **149A** (1988) 1
Viscosity of a liquid (see *Oscillating-cup viscometer*) **149A** (1988) 107

Weak-coupling approximation (see *Classical particle, bound*) **149A** (1988) 232
Wetting transition
– Quasi-wetting on a sphere - Hołyst and Poniewierski **149A** (1988) 622
Weyl–Wigner transformation
– An extended—for special finite spaces - Galetti and De Toledo Piza **149A** (1988) 267

Zubarev's statistical operator (see *Markovian kinetic equations*) **149A** (1988) 245
